

# **BOIL ADVISORY**

## **Town of White Castle Water System**

**October 25, 2023**

The Town of White Castle has experienced problems with our water supply system due to a water leak on the main water line near the White Castle Community Center.

Because of these problems, the water produced by our water supply system is of questionable microbiological quality. More than 300 customers were affected from Aucoin Street to Hwy 405.

Therefore, as a precaution, the Town of White Castle is issuing a BOIL ADVISORY effective immediately. This BOIL ADVISORY is to remain in effect until rescinded by the Town of White Castle

It is recommended that all consumers disinfect their water before consuming it (including fountain drinks), making ice, brushing teeth, or using it for food preparation or rinsing of foods by the following means:

Boil water for one (1) *full* minute in a clean container. The one minute starts after the water has been brought to a rolling boil. (The flat taste can be eliminated by shaking the water in a clean bottle, pouring it from one clean container to another, or by adding a small pinch of salt to each quart of water that is boiled.)

Again, please be sure to disinfect your own water prior to consumption until you have been advised otherwise.

The Town of White Castle Water System will rescind this Boil Advisory upon notification from the Louisiana Department of Health - Office of Public Health that two additional water samples collected from our water supply system have shown our water to be safe.
